CITADEL MINIATURES WARHAMMER RANGE

Warhammer is far more than just a game. Warhammer is a perilous world of fantastic adventure where vast armies of Citadel Miniatures clash on the fields of battle. The high level of craftsmanship exhibited in every Citadel Miniature makes the models perfect for collecting and painting, as well as for use as gaming pieces. In this catalog you will find actual size photographs and code numbers for Games Workshop's entire range of miniatures for Warhammer, the game of fantasy battles. On each page you will find packaging notes indicating how many miniatures come in each blister pack. Unless otherwise noted, all miniatures in this catalog are cast entirely in pewter and are packaged with Games Workshop's plastic slottabases. Models which require a shield are packaged with one of Citadel's plastic shields. The shields for the Miniatures pictured in this catalog were randomly selected to show the variety available and do not necessarily reflect the exact shield any model may be packaged with. Please note that miniatures shipped from Games Workshop to our distributors are in sleeves of 12 blisters. These packs are a fixed assortment of miniatures for the particular code. Specific mixes of figures or blisters cannot be ordered. With the studio constantly sculpting new figures, look for updates with new miniatures appearing regularly in the US edition of White Dwarf magazine.

0762 – Dwarfs are grim warriors who never forgive, never surrender, and never forget a grievance. They are renowned for their courage and rock-solid dependability on the battlefield.

0754 – Regiments of proud Elven spearmen and keen-eyed archers are made up of the citizen-soldiers of Ulthuan. Every High Elf is a trained and deadly fighter in times of war.

0760 – Orcs are harsh and brutal warriors who love nothing more than a good scrap. If Orcs can’t find any enemy to fight they will quickly resort to battling it out amongst themselves.

0755 – When grouped in large formations Goblins become incredibly effective troops capable of swarming over the enemy and overwhelming them in superior numbers.

Citadel Miniatures are supplied unpainted. These models require assembly. We recommend that parts are carefully cleaned and trimmed with a modelling knife before assembly, and that the model is undercoated before painting with Citadel paints.
PLASTIC BOXED SETS

0759 - Imperial Halberdiers form the backbone of the armies of the Empire. Their heavy-bladed halberds can slice through armor and the Halberdiers' battle-prowess has earned them the grudging respect of their foes.

0758 - The Regiment of Altdorf is a fast way to build up a huge and formidable unit that will wreak havoc on the battlefields of the Warhammer World. This set includes 30 shields and a complete set of shield transfers.

0761 - To complete their goal of world conquest Skaven emerge from the secret tunnels of their dreaded Under-Realm. Skaven infantry are fast and deadly when massed together.

0756 - The Fantasy Fighters boxed set contains 5 Dark Elves, 5 Dwarfs, 5 Skaven, 5 Orcs, 5 Goblins, and 5 Wood Elves. Also included in this set are shields, alternate heads, and additional hand weapons.
HIGH ELF BOXED SETS

0825 – The High Elf Battle Chariots smash forward into the enemy lines crushing the foes beneath their steel shod wheels.

0830 – The mighty wings of a Pegasus give the High Elves the ability to swoop down upon the fields of battle like a thunderbolt of destruction.

0822 – Only the most powerful of heroes may ride a Griffon to battle, where the creature’s razor sharp claws and hooked beak can rend foes with frightening ease.

Citadel Miniatures are supplied unpainted. These models require assembly. We recommend that parts are carefully cleaned and trimmed with a modelling knife before assembly, and that the model is undercoated before painting with Citadel paints.

HIGH ELF CAVALRY BOXED SETS

0841 – Perhaps the most feared of all Elven Cavalry, the Dragon Princes of Caledor gallop into battle upon mighty steeds wearing burnished armor forged in the form of a Dragon.

0818 – The Silver Helm Knights are an awe-inspiring sight on the battlefield as they charge forward on their mighty Elven steeds shattering the enemy lines and sending their foes fleeing before them.

8516 – Deadly in hand-to-hand as well as with the bow, Reaver Knights have the speed and mobility to ruthlessly exploit any weakness in the enemy line.

Mounted on proud Elven Steeds, High Elf Cavalry are a glorious sight as they gallop forward into battle.

The heavily armored Dragon Knights and Silver Helms overwhelm their enemies with the force of their charge, while the more lightly armored Reaver Knights skirmish forward to harass their foes with bow fire.

Swift indeed is the creature that can outmaneuver an Elven steed or escape its pursuit. The fact that no invading army has ever captured Ulthuan is in part a tribute to the power and skill of the High Elven Cavalry.
0840 - Joseph Bugman was the most famous Dwarf Brewer of all time until Goblins destroyed his brewhouse. Swearing a terrible vengeance against all greenskins, Bugman and his companions now roam the Warhammer World seeking to settle old scores.

0836 - The Anvil of Doom is an ancient artifact able to store magical power. In times of dire need, the Anvil is ridden into battle by a Dwarf Runesmith who strikes the Anvil to unleash deadly lightning bolts that can rip through the enemy lines.

0828 - Dwarf Kings have used the Throne of Power for over four thousand years to cut bloody swathes through the enemy's troops. Indestructible and able to heal the wounds of its bearers, the Throne of Power is the most powerful and ancient of all Dwarfen Relics.

Citadel Miniatures are supplied unpainted. These models require assembly. We recommend that parts are carefully cleaned and trimmed with a modelling knife before assembly, and that the model is undercoated before painting with Citadel paints.

0834 – One of the most deadly weapons in the arsenal of the Chaos Dwarfs, the Earthshaker is an awesome war machine which creates devastating shockwaves to pulverize enemy troops.

0838 – A rare mutation of a Great Taurus, the Lammasu is a creature of many magical properties. A Lammasu exhales whirling clouds of black sorcery that enwrap and enfold the monster with protective power.

0833 – The Great Taurus is a huge and terrifying monster with the massive body of a bull and membranous wings like a dragon. Breathing out clouds of flame, the Great Taurus strikes terror into the hearts of its foes.
DWARF WAR MACHINES
BOXED SETS

0837 - The Dwarf Flame Cannon spews forth burning pitch, to strike fear into the hearts of even the Dwarfs' staunchest foes.

0842 - Gyrocopters are deadly flying machines that swoop down from the mountain crags to blast the enemy with bombs and scalding jets of superhot steam.

The hiss of air escaping told Thorrik about the leak before the pressure gauge began dropping. Even with the dim of battle all around him and the hordes of howling greenskins approaching closer, Thorrik found time to unleash a torrent of potent Dwarf curses at the faulty piping. Nervously fidgeting with his short beard the rookie tar loader stepped backwards from the heaving over-pressurized Flame Cannon.

"Get back here and work those billows!" snapped Thorrik gruffly, as he worked feverishly at the leak. The cruelly barbed arrows of the Goblins began dropping all around. Wiping the oily grime from his face Thorrik yanked the release mechanism. With a tremendous hissing and crackling a great gout of molten fire shot from the Flame Cannon and crashed into the oncoming foe.

Despite the stench of burning Goblins Thorrik smiled and patted the loader on the back. "That's how it is done lad, only next time don't wait so long."

ORC & GOBLIN BOXED SETS

0831 - Goblin Wolf Riders are amongst the fastest and most mobile of all warriors. The chilling bloodthirsty howl of the giant wolves is a sound feared throughout the Old World.

0844 - Grom the Paunch is a hugely obese and extremely fierce Goblin Warlord. Spurring his massive chariot to top speed, Grom crashes into the enemy lines and splinters their formations asunder.

0824 - Orc Shaman often ride to battle on Wyverns, ferocious winged beasts which attack with huge rending claws and gaping jaws full of barbed teeth.

0823 - Hurling vast boulders to decimate and flatten enemy units, the Rock Lobber is an awesome machinery of destructive.

Citadel Miniatures are supplied unpainted. These models require assembly. We recommend that parts are carefully cleaned and trimmed with a modelling knife before assembly, and that the model is undercoated before painting with Citadel paints.

0518 – Dieter Helsnicht – the Doomlord hurls across the battlefields of the Old World. Wielding the Chaos Runesword and the Flaming Skull staff he strikes down his enemies and crushes his foes.

In the Old World it is all too easy to hide evil. Many good men fall prey to the tempting powers of Dark Sorcery. Secrets of life and death often lead the unwary into more and more foul experiments until the final borders of necromancy are crossed and there is no turning back. Hungry for power and eternal life, Necromancers sell their humanity and raise the dead for their own vile purposes. Evil glints appear in long empty eye sockets as moldering armies of the walking dead leave their graves and gather to serve their evil masters.
The Empire is one of the largest of the varied realms in the Warhammer World. Its borders stretch from the Grey Mountains in the south to the Forest of Shadows in the north, encompassing prosperous cities, dark forests, tall mountains, and continent-spanning rivers. Despite boasting one of the most powerful armies in the Old World, the Empire is in constant danger and must remain ever vigilant. To this day the Empire remains a bulwark against the growing forces of evil that threatened to engulf the lands.

0826 – The most powerful of the Empire’s heroes ride to war mounted on a majestic Imperial Pegasus.

0835 – Astride his War Griffon Deathclaw, the Emperor Karl Franz leads the mighty Empire armies to battle.
IMPERIAL WAR MACHINES BOXED SETS

0811 – Pulled by two steel-clad steeds, the War Wagon is a mobile battle tower bristling with a variety of unique and deadly weapons.

0812 – Armed with a mighty cannon and protected by thick armor plating, the Steam Tank rolls forward to battle powered by a great iron boiler.

One of the most powerful and technologically advanced realms in the Old World, the Empire has established an Artillery School as well as an Engineers School solely for the purpose of developing the best and most devastating war machines. With the brightest and most innovative minds (such as the famed inventor of the Steam Tank, Leonardo of Miranglio) working night and day, there is a wide variety of destructive engines for Empire commanders to select from. With the added punch of artillery and war machines an Empire Army is not a foe to be easily beaten.

0817 – The Grand Theogenist rides to war on the Altar of Sigmar, a death-dealing war machine that leaves only broken and mangled enemy units in its wake.

Citadel Miniatures are supplied unpainted. These models require assembly. We recommend that parts are carefully cleaned and trimmed with a modelling knife before assembly, and that the model is undercoated before painting with Citadel paints.

0814 – The Knights of the White Wolf wear mantles of wolf skin over their armor, and spurn shields, helm, and lances in favor of heavy two-handed hammers.

0815 – Tracing their origins back to the wars against Araby, the Knights Panther wear full battle armor draped with panther skins and carry tall lances.

0821 – Elector Counts are the rulers of the city-states and provinces which make up the Empire. Each Count is a mighty Hero armed with one of the twelve magic swords known as Runefangs.

0820 – These four Heroes of the Empire are: the Emperor’s Champion, the Captain of the Reiksguard, the Imperial Standard Bearer, and the Supreme Patriarch of the Colleges of Magic.
SKAVEN BOXED SETS

0516 - Towering ominously over the Skaven hordes, a Vermin Lord rips into the foe like a mighty whirlwind of destruction.

0517 - Powered by hordes of Giant Rats, the Doomwheel churns forward generating bolts of deadly warp-lightning.

0839 - Ringing out a mind-ripping peal of death the Screaming Bell has enough power to raze whole cities.

Citadel Miniatures are supplied unpainted. These models require assembly. We recommend that parts are carefully cleaned and trimmed with a modelling knife before assembly, and that the model is undercoated before painting with Citadel paints.

The Warhammer Army books are an indispensable aid to all Warhammer players. In each book you will find full army lists, special rules, unique weapons, and complete background for the army of your choice. With every major race in the World of Warhammer covered in great detail, players may command their favorite troop types on the battlefield. To date Warhammer Armies books for Dwarfs, the Empire, High Elves, Orcs and Goblins, and Skaven have been released with books for Undead, Chaos, Dark Elves, Wood Elves, and Bretonnians coming soon. Periodically, as in the case of the Chaos Dwarfs, Warhammer players can look for army updates and complete new army lists in White Dwarf, the monthly Games Workshop magazine.
The Giant strides about the battlefield yelling and belching, instilling fear into even the most stalwart of warriors. Immense size and strength give him a huge advantage in combat. A blow from a Giant has no chance of being stopped by ordinary armour. Even if you can defend yourself against the Giant’s powerful attacks you are by no means safe. Giants are notorious drunkards and have a tendency to fall over when startled, crushing anything beneath them.

Model designed by Aly Morrison
